

# Webexpenses & Netsuite Integration

Webexpenses integration with Netsuite allows data to be synchronised between the two systems, including:

- Auto synchronisation of tax, customer, vendors and cost centres
- User provisioning using Netsuite as the primary source of data
- Configurable transfer for personal and credit card spend
- Google Vision-powered OCR technology to scan and upload receipt data

## Common client challenges

| Poor visibility on T&E spend

| Unable to maximise VAT reclaim

| Reducing expense processing costs

| Fully eliminating a paper-based process

## Why Webexpenses

Webexpenses is a leading expense management provider with over a billion expenses claimed worldwide and 98% client retention. But what makes Webexpenses different?

| Global support  
Support is in-house, easily accessible, and available to all users at no extra cost.

| Custom configured  
We meet your specific business requirements, with a dedicated account manager.

| Transparent pricing  
Only active users will be charged a flat, monthly fee.

| Scalable  
Our in-house dev team releases over 100+ updates and feature upgrades per year.
